Technical data

Fire resistance class
EI 15 ¹⁾

Lining weight
13 kg/m² ²⁾

The above-mentioned parameters apply to a partition made of sheet metal profiles with a thickness of 0.55 and 0.6 mm.

In the SP - 1x12.5 GKFI DFH2/CD 60. S system, the use of sheet metal profiles with a thickness of 0.5 mm is not allowed.

If a partition separates environments of various temperature levels, possible application of an insulating material must be preceded with an analysis of thermal and humidity conditions. Such an analysis may result, e.g. in the necessity to apply a vapour resistant foil.

1) Based on classification no. LBO-062-KZ/25E

2) The weight specified does not include the insulation material weight.
